EXPERIENCE

Ampsight. Front End Developer.

August 2019 – Current | Washington, DC | ilovebonzai.com

- Rapidly prototyped Django-based enterprise application for government clients.
- Set up React interoperability with Django using *django-webpack-loader* and a custom webpack config.
- Lead front end development on “exquisite” app UI layer with React + Apollo GraphQL.
- Lead company’s UI Working Group in the development and implementation of company-wide design & theming standards.
- Experimented with multiple frontend styling templates and frameworks.
- Successfully advocated for the company-wide adoption of Tailwind + TailwindUI.
- Used *styled-components*, Tailwind & TailwindUI to develop a JSS-based framework-agnostic component library for use across different teams.

Bonzai. Front End Developer.

February 2019 – April 2019 | Washington, DC | ilovebonzai.com

- Worked with a team of front- and back-end developers to prototype React + Redux + Cordova social application.
- Developed and integrated a Node + Cordova external sharing feature that serves Open Graph data to crawlers and a registration page to users.
- Developed company website.

Last Call. Front End Developer.

September 2018 – January 2019 | Washington, DC | last-call-82705.web.app

- Developed Angular + Ionic + Firebase prototype food ordering application to demonstrate to potential restaurant partners, which helped lead to a Beefsteak partnership.
- Integrated with Firebase for authentication and Cloud Firestore database functionality.

Alliance for Patient Access. Web Developer.

January 2017 – February 2019 | Washington, DC

- Developed and deployed large headless WordPress site with Gatsby for AfPA’s flagship organization.
- Developed custom PHP plugins for document sorting with multiple different taxonomies on IfPA and GAfPA.
- Maintained WordPress plugins, including ACForms, JetPack, Akismet, and several lightbox and slider tools.
