PROFESSIONAL

Bonzai. Front End Developer.
February 2019 – March 2019 | Washington, DC

Rapidly prototyped React + Cordova application to onboard users and demonstrate to VC firms. Worked with a team of front- and back-end developers to build out the platform and improve UX. Collected feedback from users and applied that input to the development of the platform. Designed company website. ilovebonzai.com

Last Call. Technical Project Lead.
September 2018 – January 2019 | Washington, DC

Designed Angular + Ionic application for feature demonstrations to potential partners. Integrated with Firebase for authentication and database functionality. Led a team of interns in building a production ready ASP.NET + React mobile application. Collaborated with the project's founders on a WordPress site to bolster the brand's online presence. lastcallforfood.com

Alliance for Patient Access. Full Stack Web Developer.
January 2017 – February 2019 | Washington, DC

Developed and maintained a plethora of websites under the Alliance banner. Increased inter-site backend homogeneity, editorial accessibility for content creators, and site-specific traffic retention rates. instituteforpatientaccess.org

PROJECTS

Hackital. Founder & Sponsorship Coordinator.
April 2016 – May 2018 | Washington, DC

Cofounded annual Foggy Bottom intercity student hackathon. Developed responsive email marketing campaigns that boosted pre-event registration by nearly 50%. Organized brand development, website design, and event promotion. hackital.io

Budbot. UI & Back End Developer.
April 2016 – August 2016 | Washington, DC

Developed a text bot program and UI using Plivo. Contributed to website design and branding. budbot.co
